INDEX.

Abies Hookeriana, 289.
Abies Pattoniana, 291.
Acids, Organic, their action on cotton and flax fibre, 108.
Actinia Troglodites, 178.
Air-Engine, means of realizing advantages of, 1
Alcohol from Asphodelus, 183.
Alkaloids, Organic, Hyposulphites of, 47.
Aloe wood, 382.
Aluminates, produced artificially, 185.
Aluminium, preparation of, 378.
Amides, constitution of, 182. Amides and Ethers of Meconic and Comenic Acids, 212.
Ammonia, production of, 250.
Anauxite, 188.
Anderson, Professor, on the colouring matter of Rottlera tinctoria, 296.
Annelid, Tubicolar, remarks on a peculiar species of, 113.
Annelid tracks in the county of Clare, 278.
Aquarium, preparation of sea water for, 129.
Ascidia, formation of, 371.
Asphodelus ramosus, alcohol from its tubercules, 183.
Australian geology, 171.
Azores, shells of, 169.
Babington, C. C., on Linaria sepium, 371.
Balanophoraceæ, 383.
Balfour, Professor, on formation of Ascidia, 371.
Basalt, action of water and air on, 180.
Berthelot on ethers, 181.
Berwickshire Naturalists' Club, 345.
Beyrich, Die Conchylien der Nord-Deutschen Tertiär-gebirges, 158.
Birds in Museum of the East India Company, Catalogue of, 349.
Boracic Acid, production of, 250.
Botanical Intelligence, 183, 380.
Botanical Society, Proceedings of, 371.
Boucerosia Munbyana, 373.
Bryson, A., on worm tracks in Silurian slates, 368.
Buddhist Monuments, 352.
Buist, Dr George, on the Principal Depressions on the Surface of the Globe, 253.
Calabar Ordeal Bean, 354.
Californian Academy, Proceedings of, 374.
Calvert, F. C., on the action of Organic Acids on cotton and flax fibres, 108. On Dyeing, 265.
Chambers, Robert, on Glacial Phenomena in Scotland and the North of England, 97. On the great Terrace of Erosion in Scotland, and its relative data, and connection with Glacial Phenomena, 103.
Champion, Lieut. Col. John G., Biography of, 302.
Charcoal, Mineral, 73.
Chemical Intelligence, 181, 378.
Chevreul on the Principles of Harmony and Contrast of Colours, 166.
Chlorophyll in Infusoria, 177.
Christison, Prof., on the Calabar Ordeal Bean, 354.
Clerk-Maxwell, James, on Colour, 359.
Coal in Turkey, 172.
Colour Blindness, 359.
Comenic Acid, Ethers and Amides of, 212.
Compass, 78.

XUM

Coniferous Trees of California, 284.
Conistonite, 366.
Cotteswold Naturalists' Club, 346.
Crimea, Plants of, 184.
Cumming, Rev. J. G., on some of the more recent changes in the area of the Irish Sea, 57
Cupressus Lawsoniana, 292.
Cupressus M'Nabiana, 293.
Cyperus polystachyus, 382.
Dalton, Memoir of, 163.
D'Archiac, Coupe Geologique des Environs des Bains de Rennes, 341.
Datholite, analysis of, 369.
Datura ferox, 183.
Datura Stramonium, 183.
Davy, Dr John, Miscellaneous Observations on the Salmonidæ, 176.
Dead Sea, 261.
De Candolle on Stramonium, 183.
Delvauxite, 187.
Deville, M. St Claire, on Aluminium, 378.
Diamond, remarkable Brazilian, 387.
Diatomaceæ in Braemar, 373. In Silurian Slate, 368.
Diplarche, 184.
Dolomite, colour of, 377. Dolmite of the Alps, 386.
Dyeing Action of Gallic and Tannic Acids, 265.
Elliot, James, on certain Mechanical Illustrations of the Planetary Motions, 310.
Equinoxes, precession of, 312.
Erianthus japonicus, 374.
Erosion, great Terrace of, in Scotland, 103.
Eschara cervicornis, 377.
Ethers, remarks on, 181.
Ethers and Amides of Meconic and Comenic Acids, 212.
Euxenite, 63.
Fish, shoals of, in a dead state, in the Atlantic, 271.
Fleming on the structural character of Rocks, 176.
Fluorescence, 83.
Forbes, David, on the Chemical Composition of some Norwegian Minerals, 62.
Forbes, Prof. Edward, Biography of, 133. Introductory Lecture by, 145. Lines on the Death of, 307.
Forbes, Prof. J. D., on Measurement of Heights, 174.
Frost, remarks on its effects, 369.
Fungus in the Lungs, 382.
Geikie, A., on Fossils from Pabba and Skye, 366.
Geological Intelligence, 180, 377.
Germanic Races, their intrusion into Europe, 33.
Gieseckite, 188.
Glacial Phenomena in Scotland and the North of England, 97.
Glaciers, Movements of, 355, 356.
Gladstone, J. H., Notes on some substances which exhibit the Phenomena of Fluorescence, 83.
Glenmessan Moraines, 196.
Glensluan Moraines, 189.
Globe, Depressions on the Surface of, 253.
Greville on Diatomaceæ, 373.
Gutta Percha in India, 352. In Singapore, 380.
Harkness, Prof., on Mineral Charcoal, 73. On Annelid Tracks, 278.
Heat, Light, and Motion, 90.
Heat and Mechanical Power, 1. Mechanical Hypothesis of Heat, 4.
Heddle, Dr F. Forster, on Oxalates in the Mineral kingdom, 365. Analysis of Datholite, 369.
Heddlite, 366.
Heights, Measurement of, by boiling point of water, 174.
Himalayan Plants, 184. Himalayan Geology, 351.

How, Prof., on the Hyposulphites of the Organic Alkaloids, 47. On the Ethers and Amides of Meconic and Comenic Acids, 212.
Huxley, T. A., on a Hermaphrodite and Fissiparous Species of Tubicolar Annelid, 113.
Hyposulphites of Organic Alkaloids, 47.
Irish Sea, changes in the area of, 57.
Iron, Meteoric, from Greenland, 186.
Jacob, Captain W. S., on the Physical Features of Saturn and Mars, 203. On the Catalogue of Stars published by the British Association in 1845, 206.
Kakoxene, 187.
Keilhauite, 69.
Lakes, Dimensions of, 255.
Lawson, G., on Stellaria umbrosa, 372.
Lepidoptera near Edinburgh, 364.
Liasic Fossils of Skye, 366.
Light, Distribution of Diverging Ray of, on any azimuthal angle, 273.
Light, Heat, and Motion, 90.
Lighthouse-illumination, 273.
Linaria sepium, characters of, 371.
Low, Prof., on the Chemical Equivalents of certain bodies, and the relations between Oxygen and Azote, 175.
Lowe, Dr, on Lepidoptera near Edinburgh, 364.
M'Andrew on Shells of the Azores, 170. On Geographical Range of Testaceous Mollusca, 178.
Maclaren on Ancient Moraines in the parishes of Strachur and Kilmun, Argyleshire, 189.
Maddenia, 184.
Malvern Naturalists' Field Club, 347.
Manu-Mea of Samoa, 350.
Mars, Physical Features of, 203.
Mangosteen, Chemical Examination of the Rind of, 380.
Meconic Acid, Ethers and Amides of, 212.
Melanerpes formicivorus, 376.
Mineralogical Intelligence, 185, 386.
Minerals, Analysis of, 187.
Mines of the United States, 181.
Mollusca, testaceous, 178.
Moon's Nodes, retrogradation of, 324.
Moon's Parallax, 358.
Moon's Surface, Remarks on, 353.
Mora excelsa, 381.
Moraines in Argyleshire, 189.
Murray, Andrew, on Californian Coniferæ, 284.
Natal Geology, 350.
Neptunian Rocks, colour of, 377.
Noctiluca Miliaris, 177.
Oils, Vegetable, in the Amazon and Rio Negro districts, 381.
Oldham on Himalayan Geology, 351.
Owl, Scops, notice of, 365.
Oxalates in the Mineral kingdom, 365.
Page, Text Book of Geology, 348.
Physical Geography, 388.
Pinus Beardsleyi, 286.
Pinus Craigana, 288.
Placentation, remarks on, 372.
Planetary Motions, Mechanical Illustrations of, 310.
Pleistocene Classification, 180.
Pliocene Shells in Greenland, 362.
Pterygotus problematicus, Geologic range of, 269.
Rankine, W. J. M., on the Means of realizing the advantages of the Air-Engine, 1.
Red Sea and Mediterranean, levels of, 358.

XUM

Reviews, 158, 336.
Roemer, Die Kreidebildungen, Westphalens, 336.
Rottlera tinctoria, colouring matter of, 296.
Rottlerine, 297.
Royal Society of Edinburgh, Proceedings of, 174, 359.
Royal Physical Society, Proceedings of, 363.
Salmon, foreign species of, 377.
Salmonidæ, Observations on, 176.
Sang, Edward, on inaccuracy in computing the Moon's Parallax, 358.
Saturn, Physical features of, 203.
Saturn's Ring, 327.
Schmid, Dr, on the Rind of Mangosteen, 380.
Scientific Intelligence, 177, 376.
Sclater, P. L., on the arrangement of the genus Thamnophilus, 226.
Selwyn on Australian Geology, 171.
Silicates produced artificially, 185.
Smith, Dr J. A., on the Scops-eared Owl, 365.
Smyth, Prof., on the Moon's Surface, 353.
Soda, Carbonate of, its solubility, 379.
South Sea Islands, uprise in, 388.
Spratt on Coal in Turkey, 172.
Stainton, Entomologist's Annual, 342.
Standing-stones of Scotland, 352.
Stars, Catalogue of, by British Association, 206.
Stellaria umbrosa, characters of, 372.
Survey, Geological, of Great Britain, 106.
Swan, William, on a simple Variation Compass, 78.
Symonds, Rev. W. S., on the Geologic range of Pterygotus problematicus, 269.
Notice of Shoals of Dead Fish, 271.
Tannic acid in dyeing, 265.
Taxus Lindleyana, 294.
Telluro-methyle and its compounds, 379.
Tertiary Plants in Greenland, 362.
Thamnophilus, arrangement of, 226.
Thermo-Dynamic Engines, 1, 6, 19.
Thomson, Prof. William, on Mechanical Antecedents of Motion, Heat, and Light, 90.
Trap-rocks near Edinburgh, 176.
Tricyrtis pilosa, 373.
Tyrite, 67.
Victoria, Medicinal and Economical Plants of, 384.
Walterhausen on the Dolomite of the Alps, 386.
Warington, Robert, on the production of Boracic Acid and Ammonia by Volcanic Action, 250.
Wellingtonia gigantea, 384.
Wheat, its origin, 383.
Wilson, Dr G., on artificial preparation of sea-water for the Aquarium, 129.
Lines on the Death of Professor E. Forbes, 308.
Wohler on Telluro-methyle, 379.
Woodpeckers in California, 363, 376.
Worm-tracks in Silurian Slates, 368.
Yttrotitanite, 69.
Zoological Intelligence, 177, 376.

END OF VOLUME FIRST—NEW SERIES.

NEILL & Co., Printers, Edinburgh.
